

THE PAMELA DELP POLASHENSKI M.D. BREAST CANCER RESEARCH TRAINEE GRANT

We are pleased to announce that the Breast Cancer Coalition's Research Trainee Grant has been named in memory of Pamela Delp Polashenski, M.D.

Annually, **The Pamela Delp Polashenski M.D. Breast Cancer Research Trainee Grant** will be offered to pre- and post-doctoral trainees/fellows. These grants are awarded with the potential to yield significant medical breakthroughs in the cause and prevention of breast cancer, prevention of metastatic progression, and cure.

Pamela Delp Polashenski M.D.

Dr. Polashenski was first diagnosed with breast cancer at age 47 and quickly became involved with the Breast Cancer Coalition. A beloved wife, mother, and physician, she served on our Board of Directors and Research Advisory Board, and was committed to all efforts of our Advocacy Committee. Upon learning that her breast cancer had metastasized, Pam joined Common Ground, our networking group for those living with metastatic breast and/or gynecologic cancer. She leaves a lasting legacy in every aspect of our mission.
